Portfolio: https://mibhumi.github.io

Summary of Qualifications:

- ❖ Having around 4+ years of Total experience as a Software Engineer in Development and Administration of Single Page UI Applications involving Web Services
- ❖ Developed user interface by using the React.js, Flux for SPA development and used React-Router to turn it into Single Page Application (SPA)
- ❖ Designed dynamic and multi-browser compatible pages using HTML, CSS, React.JS &JavaScript
- ❖ In-depth knowledge of Source Code Management tools such as Git and BitBucket
- ❖ Worked with REST APIs to get JSON data and display using JavaScript Objects.
- ❖ Create web-based design creating mockups, interaction animations using Figma.
- ❖ Utilized popular Node framework to express to mock a Restful API.
- ❖ Worked in using React.JS components, Forms, Events, Router, Animations and Flux concept.
- ❖ Hands-on experience with React.JS with ES6 capabilities to construct reusable components.
- ❖ Used JIRA to keep track of outstanding bugs to reduce downtime, increase productivity, and improve communication.
- ❖ Experience in complete software SDLC which includes requirement, coding, design, analysis, testing, using Agile, Test-Driven methodologies.
- ❖ Excel in troubleshooting problems using innovative technical solutions
- ❖ Self-motivated, Goal-oriented with Excellent interpersonal skills and the ability to take leadership roles
- ❖ Strong organizational, verbal communication, collaboration, and excellent problem-solving skills
- ❖ Possess an analytical mind with the capability to think clearly and logically

Technical Skills:

- ❖ **Tools, Technologies, and Editors:** JIRA, Slack, Visual Studio Code, Notepad++, Adobe XD, Zeplin
- ❖ **Programming languages and Frameworks:** JavaScript, React.js, React Native, Redux, Flux, Node.js, jQuery, Bootstrap,Material UI, Sass, Scss, ES6, TailWind, Flexbox, Jest, Flux, TypeScript, Babel, Parcel, Figma, Zeplin, Webpack, Angular, MudBlazor
- ❖ **Database:** MongoDB (NoSQL), SQL
- ❖ **Operating systems:** Linux, Ubuntu, Windows 7 and 10, macOS
- ❖ **Version Control Systems:** Git, Atlassian Bitbucket, Azure

Related Work Experience:

- ❖ **Web designer and developer**   March 2023 - Present

  Company Name: VenueVision, Oakville, Ontario, Canada
  Language and Tools: React, MudBlazor, CSS, HTML5, Redux, JavaScript, Material UI, GitHub, Jest, Figma, .Net, Blazor, NodeJS

  - ● Developed and maintained large-scale client-side web applications for payment solution using React, Javascript(ES6), Redux and Mudblazor for various local clients to manage their payment, account, maintain customers, and arrange campaigns
  - ● Developed SPA application using react.js
  - ● Integrated the backend and frontend through REST APIs, incorporating web tokens for authentication, orchestrating state management with Redux, deploying functionality with React hooks, and collaborating closely with the UI/UX team to craft precise and visually appealing user interfaces using Figma and Zeplin
  - ● Utilized CSS preprocessors and maintained a deep understanding of the latest standards and best practices in HTML and CSS to create visually appealing and responsive user interfaces
  - ● Collaborate and coordinate with back-end developers to build consistent systems across the entire stack, product managers to enhance existing features and UI/UX designers to ensure seamless user experiences
  - ● Implemented RESTful APIs to interact with the back-end and handle data exchange efficiently.
  - ● Contribute innovative ideas and solutions, with the flexibility to work across the tech stack and deliver high-quality code.
  - ● Utilize Git for version control, following Agile methodology and Scrum practices for efficient project management.
  - ● Contribute to providing valuable insights and innovative solutions to enhance application performance and user experiences
  - ● Successfully generated and distributed development (Dev), User Acceptance Testing (UAT), and production (Prod) builds in collaboration with DevOps teams
  - ● Mentored and trained new Front End Developers, fostering a culture of continuous learning and skill development within the team
  - ● Demonstrated leadership qualities and contributed to an efficient and collaborative team environment
  - ● Experienced in all phases of software development lifecycle like requirement Analysis, Implementation and maintenance
  - ● Presented technical concepts to both technical and non-technical audiences, effectively communicating ideas and recommendations
  - ● Work with stakeholders, product managers, designers, and business units to execute the roadmap and support the multiple banners

- ❖ **Software Engineer**   August 2019 - December 2022

  Company Name: Kuliza Technologies, India
  Language and Tools: ReactJs, React Native, CSS, HTML5, Redux, Flux, JavaScript, Material UI, GitHub, Jest, Typescript, Figma, Zeplin, SASS, NodeJS

  - ● Played a key role in building large-scale web and mobile applications related to financial services from the ground up, leveraging technologies such as React, React Native, JavaScript, HTML, CSS, and Redux for various international and local clients like Standard Chartered-Kenya, CrediLinq
  - ● Configured backend with front-end using REST APIs, used web token, implemented redux for state management, Developed custom hook, and Worked with UI/UX team to develop pixel-perfect user interfaces using Figma and Zeplin
  - ● Contributed to Quality Analysis of the system by performing debugging, end-to-end manual testing and unit testing cases using Jest
  - ● Expertise in troubleshooting the problems generated while building and developing production support
  - ● Created mobile responsive web designs, maintained brand consistency throughout the design, and ensured the quality of code
  - ● Experienced in all phases of SDLC like requirement Analysis, Implementation, and maintenance with Agile Scrum
  - ● Responsible for the charge of tech innovations and mentorship of intern trainees regarding existing systems and products
  - ● Work closely with the product team to shape the future development of the product, providing valuable input and insights.

- Communicating with high-level clients regarding project requirements
- Worked closely with developers, project managers, UI/UX team and testers (QA) to meet client requirements

❖ **Web Developer**   January 2019 - July 2019

Company Name: rtCamp Solutions Pvt Ltd, India
Language and Tools: Php, WordPress, CSS, HTML, JavaScript (ES6), GitHub, TypeScript

- Responsible for responsive and adaptive design, and accessibility of web pages
- Assisted in creating a customized WordPress theme using front-end web technologies for the Website
- Implemented and maintained content management systems, including installation, configuration, Troubleshooting, and creating custom plugins and content types.
- Fixed bugs from existing websites and implemented enhancements that significantly to client projects and contributed to the open source plugin 'rtMedia' by solving GitHub Tickets
- Modify existing code needed and themes
- Responsible for adaptive design, and accessibility of web page
- Responsible for bug fixing and managing clients' projects and open source plugin 'rtMedia' by solving GitHub Tickets
- Manually tested sites in various browsers and mobile devices to ensure cross-browser compatibility and responsiveness

❖ **Project Trainee**   May 2018 - July 2018

Company Name: Infusion Infotech, India
Language and Tools: Java, Angular, CSS, HTML, JavaScript, GitHub

- Worked towards creating an E-Commerce website- which was a platform for sellers to market and sell their products all over India, and for buyers to purchase the products with an easy user interface
- Designed responsive web pages and created web API to enable data transmission from the backend
- Interfaced with user experience designers and other developers to ensure thoughtful and coherent user experiences

❖ **Project Trainee**   May 2017 - June 2017

Company Name: Eastern Techno Solutions, India
Language and Tools: jQuery, CSS, HTML, PHP, JavaScript, MySQL, Ajax

- Worked on a project 'Sujok Automation'; It's a hospital management project whereby automation was introduced to the work done by Therapists and Doctors in respective centers in Surat, thereby achieving optimization.
- Admin can manage appointments, prescriptions, patients, and therapists, Therapists can attend to patients based on appointment scheduled, prescribe therapy and keep a note of it in the system.
- Tested sites in various browsers and devices to ensure cross-browser compatibility and mobile responsiveness
- Written modern, performant, maintainable code for the project

---

Education:

Master of Science in Information Technology   **Academic Year:** 2017 – 2019
Dhirubhai Ambani Institute of Information and Communication Technology, Gandhinagar, Gujarat, India

Bachelor of Science in Information Technology   **Academic Year:** 2014 – 2017
J.P.Dawer Institute of Information Science and Technology, Surat, Gujarat, India

---

Accomplishments:

- CSS Certificate from hackerrank
- React: Testing and Debugging from LinkedIn
- React-Basic Certificate from hackerrank
- React Hook from LinkedIn
- Namaste React Bootcamp
